## MECHANISMS OF AGEING AND DEVELOPMENT

### SUBJECT INDEX

*Volume 54 (1990)*

*A. laidlawii*, protein biosynthesis and degradation, cell ageing, DNA single-strand breaks, 249  
acetylcholinesterase, ageing, kidney, noradrenaline, innervation, rat, 185  
adenylate cyclase, ageing, cyclic AMP, cyclic nucleotide phosphodiesterase, vascular smooth muscle relation, rat aorta, 197  
agarose/polyacrylamide isoelectric focusing, human lens, frozen-sectioning technique, development, ageing, HM-, Pre- $\alpha$ -,  $\beta$ , and  $\alpha$ -crystallins, water-soluble crystallins, 13  
aged gut-associated lymphoid tissues, ageing and immune responses of GALT, mycobacterial Ag and GALT, 143  
ageing, beta-adrenergic responses, airway reactivity, 29  
ageing, cyclic AMP, adenylate cyclase, cyclic nucleotide phosphodiesterase, vascular smooth muscle relation, rat aorta, 197  
ageing, human lens, frozen-sectioning technique, development, HM-, Pre- $\alpha$ -,  $\beta$ , and  $\alpha$ -crystallins, agarose/polyacrylamide isoelectric focusing, water-soluble crystallins, 13  
ageing, ovary, noradrenaline, rat, high pressure liquid chromatography, fluorescence microscopy, 55  
aging, bone marrow, hemopoietic and stromal precursor cells, 131  
aging, frontal cortex, dopamine receptors, cAMP, rat, 63  
aging, hypoxia, pharmacological treatment, muscular metabolites, 207  
aging, kidney, noradrenaline, innervation, acetylcholinesterase, rat, 185  
aging, mortality, Gompertz law, reliability, system theory, 75  
aging, mortality, life span, longevity, 235  
aging, protein secretion, submandibular gland, isoproterenol  $\alpha$ -methylnoradrenaline, clonidine, 221  
aging, sister chromatid exchange, cell proliferation, premature aging, progeria, 43  
aging and immune responses of GALT, aged gut-associated lymphoid tissues, mycobacterial Ag and GALT, 143  
aging heart, sarcoplasmic reticulum, phosphorylation, phospholamban,  $\text{Ca}^{2+}$  transport, 87  
airway reactivity, beta-adrenergic responses, ageing, 29  
beta-adrenergic responses, airway reactivity, ageing, 29  
bone marrow, hemopoietic and stromal precursor cells, ageing, 131  
 $\text{Ca}^{2+}$  transport, aging heart, sarcoplasmic reticulum, phosphorylation, phospholamban, 87  
cAMP, ageing, frontal cortex, dopamine receptors, rat, 63  
cell ageing, *A. laidlawii*, protein biosynthesis and degradation, DNA single-strand breaks, 249  
cell proliferation, sister chromatid exchange, ageing, premature aging, progeria, 43  
chemically defined medium, clonal life span, *Paramecium*, 259  
clonal life span, *Paramecium*, chemically defined medium, 259  
clonidine, protein secretion, ageing, submandibular gland, isoproterenol,  $\alpha$ -methylnoradrenaline, 221  
cyclic AMP, ageing, adenylate cyclase, cyclic nucleotide phosphodiesterase, vascular smooth muscle relation, rat aorta, 197  
cyclic nucleotide phosphodiesterase, ageing, cyclic AMP, adenylate cyclase, vascular smooth muscle relation, rat aorta, 197  
cytochrome oxidase, mitochondria, mouse liver, weaning, oxidative phosphorylation, 121  
development, human lens, frozen-sectioning technique, ageing, HM-, Pre- $\alpha$ -,  $\beta$ , and  $\alpha$ -crystallins, agarose/polyacrylamide isoelectric focusing, water-soluble crystallins, 13  
DNA methylation, dysdifferentiation, 1  
DNA single-strand breaks, *A. laidlawii*, protein biosynthesis and degradation, cell ageing, 249  
dopamine receptors, ageing, frontal cortex, cAMP, rat, 63  
dysdifferentiation, DNA methylation, 1

fluorescence microscopy, ovary, noradrenaline, rat, high pressure liquid chromatography, ageing, 55

frontal cortex, aging, dopamine receptors, cAMP, rat, 63

frozen-sectioning technique, human lens, development, ageing, HM-, Pre- $\alpha$ -,  $\beta$ , and  $\alpha$ -crystallins, agarose/polyacrylamide isoelectric focusing, water-soluble crystallins, 13

glutathione peroxidase, Kaschin-beck disease, selenium, membrane, phospholipid, mucopolysaccharides, 103

Gompertz law, mortality, aging, reliability, system theory, 75

hemopoietic and stromal precursor cells, bone marrow, aging, 131

high pressure liquid chromatography, ovary, noradrenaline, rat, fluorescence microscopy, ageing, 55

HM-, Pre- $\alpha$ -,  $\beta$ , and  $\beta$ -crystallins, human lens, frozen-sectioning technique, development, ageing, agarose/polyacrylamide isoelectric focusing, water-soluble crystallins, 13

human lens, frozen-sectioning technique, development, ageing, HM-, Pre- $\alpha$ -,  $\beta$ , and  $\alpha$ -crystallins, agarose/polyacrylamide isoelectric focusing, water-soluble crystallins, 13

hypoxia, aging, pharmacological treatment, muscular metabolites, 207

IL2 effect on aged and gut-associated lymphoid tissues, immune interventions with IL2, immune intervention and aging, 163

immune interventions with IL2, immune intervention and aging, IL2 effect on aged and gut-associated lymphoid tissues, 163

immune intervention and aging, immune interventions with IL2, IL2 effect on aged and gut-associated lymphoid tissues, 163

innervation, aging, kidney, noradrenaline, acetylcholinesterase, rat, 185

isoproterenol, protein secretion, aging, submandibular gland,  $\alpha$ -methylnoradrenaline, clonidine, 221

Kaschin-beck disease, selenium, glutathione peroxidase, membrane, phospholipid, mucopolysaccharides, 103

kidney, aging, noradrenaline, innervation, acetylcholinesterase, rat, 185

life span, aging, mortality, longevity, 235

longevity, aging, mortality, life span, 235

membrane, Kaschin-beck disease, selenium, glutathione peroxidase, phospholipid, mucopolysaccharides, 103

$\alpha$ -methylnoradrenaline, protein secretion, aging, submandibular gland, isoproterenol, clonidine, 221

mitochondria, mouse liver, weaning, oxidative phosphorylation, cytochrome oxidase, 121

mortality, aging, Gompertz law, reliability, system theory, 75

mortality, aging, life span, longevity, 235

mouse liver, mitochondria, weaning, oxidative phosphorylation, cytochrome oxidase, 121

mucopolysaccharides, Kaschin-beck disease, selenium, glutathione peroxidase, membrane, phospholipid, 103

muscular metabolites, hypoxia, aging, pharmacological treatment, 207

mycobacterial Ag and GALT, aged gut-associated lymphoid tissues, aging and immune responses of GALT, 143

noradrenaline, aging, kidney, innervation, acetylcholinesterase, rat, 185

noradrenaline, ovary, rat, high pressure liquid chromatography, fluorescence microscopy, ageing, 55

ovary, noradrenaline, rat, high pressure liquid chromatography, fluorescence microscopy, ageing, 55

oxidative phosphorylation, mitochondria, mouse liver, weaning, cytochrome oxidase, 121

*Paramecium*, clonal life span, chemically defined medium, 259

pharmacological treatment, hypoxia, aging, muscular metabolites, 207

phospholamban, aging heart, sarcoplasmic reticulum, phosphorylation,  $\text{Ca}^{2+}$  transport, 87

phospholipid, Kaschin-beck disease, selenium, glutathione peroxidase, membrane, mucopolysaccharides, 103

phosphorylation, aging heart, sarcoplasmic reticulum, phospholamban,  $\text{Ca}^{2+}$  transport, 87

premature aging, sister chromatid exchange, cell proliferation, aging, progeria, 43

progeria, sister chromatid exchange, cell proliferation, aging, premature aging, 43

protein biosynthesis and degradation, *A. laidlawii*, cell ageing, DNA single-strand breaks, 249

protein secretion, aging, submandibular gland, isoproterenol,  $\alpha$ -methylnoradrenaline, clonidine, 221

rat, aging, frontal cortex, dopamine receptors, cAMP, 63  
rat, aging, kidney, noradrenaline, innervation, acetylcholinesterase, 185  
rat, ovary, noradrenaline, high pressure liquid chromatography, fluorescence microscopy, ageing, 55  
rat aorta, ageing, cyclic AMP, adenylate cyclase, cyclic nucleotide phosphodiesterase, vascular smooth muscle relation, 197  
reliability, mortality, aging, Gompertz law, system theory, 75

sarcoplasmic reticulum, aging heart, phosphorylation, phospholamban,  $\text{Ca}^{2+}$  transport, 87  
selenium, Kaschin-beck disease, glutathione peroxidase, membrane, phospholipid, mucopolysaccharides, 103

sister chromatid exchange, cell proliferation, aging, premature aging, progeria, 43  
submandibular gland, protein secretion, aging, isoproterenol,  $\alpha$ -methylnoradrenaline, clonidine, 221  
system theory, mortality, aging, Gompertz law, reliability, 75

vascular smooth muscle relation, ageing, cyclic AMP, adenylate cyclase, cyclic nucleotide phosphodiesterase, rat aorta, 197

water-soluble crystallins, human lens, frozen-sectioning technique, development, ageing, HM-, Pre- $\alpha$ -,  $\beta$ , and  $\alpha$ -crystallins, agarose/polyacrylamide isoelectric focusing, 13  
weaning, mitochondria, mouse liver, oxidative phosphorylation, cytochrome oxidase, 121
